The Metris Cargo Van difference.

| Feature | Metris Cargo Van | Ram ProMaster City Cargo Van | Ford Transit Connect Cargo Van | Nissan NV200 Cargo Van | Chevy City Express Cargo Van | Mercedes-Benz Advantage |
|--|------------------|------------------------------|--------------------------------|------------------------|------------------------------|---|
| ATTENTION ASSIST This standard safety feature helps you stay alert behind the wheel by monitoring driving patterns and providing alert in case tiredness is detected. | S | | | | | Feature not available on competitor models. |
| CROSSWIND ASSIST Designed to safeguard against wind gusts, Crosswind Assist helps the Metris stay its course by battling strong side winds with targeted, one-sided brake interventions. | S | | | | | Feature not available on competitor models. |
| LANE KEEPING ASSIST The Metris Lane Keeping Assist feature can help you steer clear of a potential accident by warning you when the Metris begins to wander unintentionally across visible lane markings. | A | | | | | Feature not available on competitor models. |
| COLLISION PREVENTION ASSIST The unique-to-Metris COLLISION PREVENTION ASSIST works by visibly warning the driver if a vehicle in front is too close. And if it knows a collision is about to happen, it assists in applying enough brake to help prevent an accident. | A | | | | | Feature not available on competitor models. |
| BLIND SPOT ASSIST Exclusive to Metris, the Blind Spot Assist feature sees what the driver cannot. Monitoring both sides of the vehicle, drivers get a visual alert and audible warning if the turn signal is activated when a vehicle is detected in the van's blind spot. | A | | | | | Feature not available on competitor models. Exclusive to Mercedes-Benz. |
| BACKUP ALARM Protect yourself and those around you with the Metris's Backup Alarm. Engaged when the vehicle is put into reverse, the Metris emits an audible signal to alert everyone that you are backing up. | A | | | | | Feature not available on competitor models. |
| PARKTRONIC w/ Active Parking Assist Using ultrasonic signals, PARKTRONIC's six monitors measure the distance between the vehicle's front and rear bumpers and an obstacle. If an obstacle gets too close, it visually and audibly warns the driver, allowing the driver to fit into tight spaces with a lower chance of collision. Active Parking Assist helps identify a suitable parking space and steers the vehicle into it automatically. The driver simply has to operate the accelerator and brake pedal. | A | | | | | Feature not available on competitor models. Exclusive to Mercedes-Benz. |
